Brandon,  
I wanted to follow up with you on your request. I have contacted the refinery folks for help in answering your question. They are reviewing their files now. We should have a response for you by the middle of next week. In the meantime, feel free to give me a call or email if you have questions.

Thanks,  
Liz

Subject: Flint Hills Refinery Wastewater

Hi Elizabeth

I'm currently reviewing the 2011 Site Characterization report and I was hoping to get alittle more information about the wastewater system and wastewater lagoons discussed in sections 3.1.1.6 and 3.1.1.6.1. The report is specific about sulfolane in wastewater. Is there documentation or information on what other contaminants are contained within the wastewaster and "out-of-spec" wastewater over the operational history of the facility?
